Hygiene Promotion

Sustained Health Gains from WASH

Enabling Environment
WASH at Scale in Ethiopia

- Collaborative effort: GOE, USAID, WB/WSP
- Supporting Amhara region of Ethiopia (20 million)
Elements of Scale Approach

- Embedded in National Hygiene and Sanitation Strategy
- Engaged the multiples: sectors, behaviors, partners
- Community ignition and action
- Backed up with household visits to negotiate change
- Carried out by health extension workers
Why Focus on Sanitation?

- Vital for human health
- Generates economic benefits
- Enhances dignity, privacy and safety
- Protects the environment
- Improving sanitation is achievable!
Progress in Latrine Coverage

Progress of Latrine Coverage in Four Districts in Amhara

- Gonder
- Achefer
- Kew et
- Tehuledere

Percentage

Baseline Jan.08
Total Coverage Jan 09
